

# Adam Dono

## UI/UX Design & Fullstack Developer

### Skills

- Angular
- Bootstrap
- Wordpress
- Figma
- PhotoShop
- Framer
- REST APIs
- UI/UX design
- Framer
- Javascript
- TypeScript
- MongoDB
- Version Control/Git
- FireBase
- Googling
- Python
- Flask

### Work Experience

**2023 March -Current**

#### Shaper

Full Stack Developer

- Building front-end and back-end projects/apps, bug fixing, database management, and continuous learning.

UIUX Designer

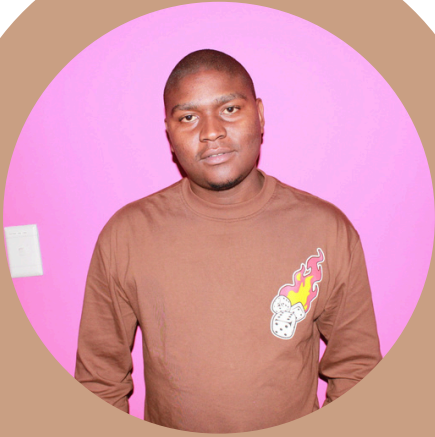

- Design robust mobile and web applications using figma framer and wordpress

### Education History

**Grade 12**

**Thusa Setjhaba Secondary School**

**IT System Support NQ5**

Hey my name is Adam A storyteller in design, a problem solver in code. I create digital experiences that feel effortless, intuitive, and human. My passion lies in crafting interfaces that don't just look good but make people feel something—engaged, empowered, and understood. Beyond pixels and prototypes, I thrive on collaboration, mentorship, and pushing creative boundaries. I love exploring how technology and design intersect to shape the way we interact with the world. Whether it's refining a user journey or building something from the ground up, I'm here to create with purpose.

**flipbrickzmusic1@gmail.com**

## Soft Skills

- Problem-solving: The ability to analyze complex problems, think critically, and devise creative solutions
- Communication: Effective communication is vital for developers to collaborate with team members
- Time Management
- Adaptability and Learning Agility

## Projects

### MovieBuddy [Live demo](#)

Discover the latest blockbusters and explore a vast collection of movies with ease. View detailed information about each film, watch trailers, and filter by categories or search by name to find exactly what you're looking for. Enjoy endless browsing with the "View More" feature for even more movies.

Prefer a darker theme? Switch to dark mode with a single click! Movie Buddy is designed to work seamlessly on both desktop and mobile devices, offering a fully responsive experience. Built with Angular 18 and powered by the TMDB API, Movie Buddy ensures you get the latest movie updates, with smooth performance and easy navigation, all deployed using Render

### AbleWheels [Live demo](#)

A UI/UX Design based on a transportation app that is aimed to assist people with disability to get easy and accommodative transportation. One of the features is the ability to select a trip for the moment or schedule one for recurring rides and also select your own available driver. Also, choose the amount you are willing to pay. This is a prototype.

### Scamify. [Live demo](#)

Scamify is a Cyber security Awareness UI/UX design which is a mobile first design. On this particular app, the user is supposed to sign up, log in, and land on the dashboard where they can browse certain courses and learn about cyber security. This is a prototyped design.

## PowerRent [Live demo](#)

Power Rent is an on going design that am currently designing for a client so this design is a mobile first design that aims to help remote working professional get access to alternative energy when loadshedding hits so they can sign in the application and if they are a renter, they will see list of available power souces and the can click to view the details if they interested they can book a power source enter their location and other details , which now the lender or product owner will get the notification and aprove if the location is near and they will have a private chat this is currently in design mode 90% done

## Register App [Live demo](#)

This was in house project where i was the lead developer its basically a attendace app where learner and staff come on to the application and sign in to mark attendance

## Portfolio Build With Framer [Live demo](#)

This is my Design portfolio i created using a nocode tool which is framer this was fun to build as i had to go into my creative side and see which abilities or projects I wanted to showcase. I ended with lot of animation as i liked it very much. I definitely will be rebuilding this and making it more nicer
