PACE ACADEMY — END-TO-END USER JOURNEY & DEMO SCRIPT

A Step-by-Step Walkthrough: From High School Diagnostic to Employer-Verified Credentials

Target Audience: Hackathon Assessors, Enterprise Partners & Academic Evaluators | **Version:** 1.0

USER PERSONA: Thabo Mthembu (Age 17, Grade 11/12 Matric Candidate, Soweto)
• **Goal:** Qualify for a university degree in Computer Science / Information Systems or secure a high-demand tech job.
• **Pain Points:** Struggling with Pure Mathematics (48%); private tutoring is unaffordable (R350/hr); has no career guidance and doesn't know his university Admission Point Score (APS) until it is too late.

1. The 5-Stage Journey: High School to Workplace Placement

Stage 1: Instant Academic Diagnostic:
Thabo uploads his official term report card photo/PDF. The multimodal Vision OCR extracts his 7 CAPS subjects, detects his struggle subject (Pure Maths at 48%), and automatically computes his official university APS score (29 points) — showing he qualifies for an IT Diploma, but is 3 points shy of a University Bachelor's pass.

Stage 2: Adaptive Study Planning & Socratic AI Tutoring:
The platform automatically schedules extra study blocks for Pure Mathematics on his weekly timetable. When studying, Thabo opens **Bookworm**, the 24/7 Socratic Voice AI companion. Bookworm doesn't give him answers; it engages in audio-first Socratic questioning to build first-principles conceptual mastery.

Stage 3: Hands-On Technical Skill Building (LMS):
Parallel to high school, Thabo enrolls in accredited digital courses (Web Development, Python). Without installing software, he writes and executes code inside the browser using the built-in Monaco Code Editor, receiving real-time auto-graded feedback on programming assignments.

Stage 4: Cryptographic Credentialing & QR Verification:
Upon completing the modules, Thabo is issued a tamper-proof Pace Academy Certificate. It features a unique cryptographic hash and dynamic QR code that employers or recruiters scan to view his verified code portfolio, course hours, and competencies.

Stage 5: Enterprise Upskilling & Career Mobility:
Equipped with verified digital credentials and an improved matric APS score, Thabo qualifies for higher education bursaries and entry-level corporate learnerships tracked directly through Pace Academy's B2B enterprise portal.

2. 4-Minute Judge Demo Script (Live Walkthrough Protocol)

Follow this exact step-by-step sequence to demonstrate the platform's core capabilities in under 4 minutes:

Step 1: The Landing Page (0:00 - 0:30)
URL: /
• Highlight the value proposition: *'From Matric to Market-Ready'*.
• Showcase the clean 2-column layout, live platform stats (Learners, Courses, 24/7 Support), and dynamic accreditation alignment badges (CAPS, QCTO, SETA).
• Click **'Start Learning Free'** to transition to the login portal.

Step 2: Student Dashboard & Report Card Scanner (0:30 - 1:30)
URL: /student/career-guidance
• Log in as a student (or click Career Guidance).
• Demonstrate the **Report Card OCR Scanner**: Upload an official school report card (PNG/PDF).
• Show the zero-trust server processing: marks are extracted automatically and locked against tampering.
• Display the calculated **University APS Score**, degree qualification eligibility (BSc vs. Diploma), and the flagged **Struggle Subjects** alert.

Step 3: Adaptive Timetable & Bookworm Voice AI (1:30 - 2:30)
URL: /student/calendar & Floating Bookworm Mascot
• Show how the weekly timetable automatically balances study slots, scheduling extra revision time for flagged struggle subjects.
• Click the animated **Bookworm Mascot** (with floating bob, blinking eyes, and tassel sway).
• Speak or type a question: *'Bookworm, guide me through solving quadratic equations.'*
• Point out the Socratic response (guiding questions, not rote answers) and the daily **Sparks Quota counter**.

Step 4: Monaco Code Editor & Hands-On LMS (2:30 - 3:30)
URL: /student/course/27 (Web Development / Coding)
• Open a code lesson module.
• Show the embedded **Monaco Code Editor** (VS Code engine in browser).
• Run Python / HTML / JS code in real time with instant output in the integrated terminal.
• Demonstrate automated code assignment submission and immediate auto-grading feedback.

Step 5: Verifiable Digital QR Certificates & Teacher Hub (3:30 - 4:00)
URL: /student/certificates & /teacher/dashboard
• View the issued Certificate of Completion.
• Scan the **Dynamic QR Code** on a mobile phone to show the public tamper-proof verification page.
• Briefly switch to the Teacher/Admin dashboard to show class progress analytics, course authoring, and B-BBEE corporate tracking.

3. Pre-Configured Test Credentials & Navigation Matrix

Portal Role	Demo Email	Key Features to Evaluate	Target Route
Student	learner@gmail.com	Report Card OCR, University APS, Bookworm Voice AI, Monaco IDE, QR Certificate	/student/dashboard
Teacher	adam@thedigitalacademy.co.za	Modular Course Builder, Monaco Code Assignment Setup, Class Analytics, Grading	/teacher/dashboard
Admin	admin@pace.com	User Management, Course Approval Workflow, System Logs, B2B Leads & B-BBEE Reports	/admin/dashboard

Summary for Assessors: This user journey reflects a cohesive, production-deployed platform that addresses every stage of South Africa's educational and youth employment funnel. All listed features are active and testable in the live environment.
