ABOUT ME

Adam Dono

UIUX DESIGNER

I am from the Vaal in a town located in the middle of nowhere, but i currently reside in Soweto which is next to johannesburg where i spent most of my time with my family or i am on the internet either working or learning a new skill

Page 04 of 11

ADAM DONO

UIUX DESIGNER

i leaned more into UIUX after i became a team lead but i always had an eye for design as in 2020 i was doing Phototgraphy at Vut and i was learning these amazing design skills or multimedia stuff

FRONT END DEVELOPER

I started with front end development in 2022 where i learned various tech skills which i will discuss later on it was a fun experience as it was new and exciting i felt like i was gonna change the world especialy local where i come from , where coding is not seen as a easy or normal thing to do

SKILLS

Page 06 of 11

Technical Skills

In UI/UX Design, I use Figma for prototyping and wireframing my designs, Photoshop to refine and edit images, and Canva to create most of my documentation. For deploying static websites, I rely on Framer, which allows for efficient, no-code deployment.

In Front-End Development, I use traditional coding languages and tools, including HTML, CSS, and Bootstrap for styling, along with JavaScript and Angular to build dynamic single-page applications.
